Landscape Design & Consultation Fees:

We Plan You Plant Design Consultation

Do-it-yourself projects in which design solutions can be generated without visiting your property. Please bring pictures, measurements and a sketch of the area to be worked on. During your 1 hour appointment, our landscape designer will show you the recommended plants and materials, assist you in selection and, if desired, arrange for delivery.

CONSULTATION:

The process starts with a consultation at your home or in our office with one of our designers/architects. This is our opportunity to understand the scope of your project, listen to your ideas, exchange ideas, show you our portfolio, and explain how Jim Whiting Nursery may assist you. During this visit we'll help you determine whether design services are needed and establish budget parameters based on the scope and scale of your project.

DESIGN SERVICES:

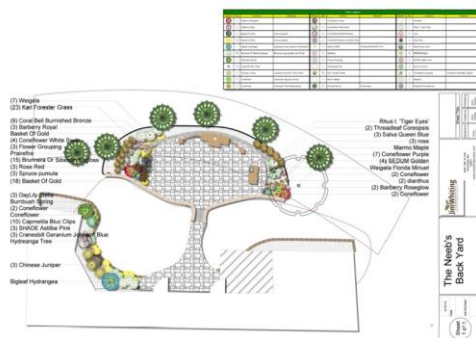

After our initial consultation we take measurements and photographs, walking the site to examine its strengths and challenges. Our designers then churn ideas based on conversations from the initial consultation to create a customized landscape design that reflects your lifestyle and unique property. We view this design process as a joint effort and encourage your involvement every step of the way. If no landscape plan is needed, we will present an estimate based on your existing plan or specifications.

DESIGN PRESENTATION:

With the design complete, a presentation meeting is set up for the designers to walk you through the layout details, material choices, and to discuss the project estimate. Based on your needs, our designers can help prioritize and develop a strategy for how to proceed to the installation phase. Upon acceptance of the contract, we will schedule the work for installation.

What to Expect

- Call to set up an appointment. One of our designers will meet with you at your home to discuss your needs, take measurements, and snap a series of photos.
- Next, Client needs to call to set up appointment see a customized design and estimate.
- After viewing your custom design This estimate will include details on plant and material choices, pricing, and installation costs.
